Produse periculoase

Found in nearly all natural waters, chloride affects human taste above 250 mg/L. High levels inhibit plant growth, and many industrial processes need to limit chloride concentration. The model CD-DT, multi-range kit, is supplied with the demineralizer bottle for high-range sample dilution. Contains 100 tests.

Utilizes drop count titration - a simple, economical titration method

Kit contains all required reagents and apparatus in a rugged carrying case for analysis in the field
