Produse periculoase

Maintaining good water quality is essential for profitable fish production. In many cases, the availability and cost of "crop" insurance is directly related to testing programs. This kit utilizes drop count titration and color disc methods to deliver fast, accurate results.

An economical choice, this model includes nine basic water quality tests

Reagents and equipment are supplied for drop-count titration and colorimetric measurement using continuous-gradient color discs

Specificații

Aplicație:	Aquaculture
Model:	FF-1A
Platforma:	Disc culoare
